

Dear Neighbors -

It has come to our attention that there is a petition circulating to request the city to lower the speed limit on Brentwood Trail. The Keller Police Department performed a speed study at BEHOA's request in May of this year.

Attached you will find the email from the Chief of Police to our committee member as well as the study results submitted to the board. The board has not met formally since this study to take action but, via email the consensus was that since there appears to be no real issue with compliance to the posted limit that there was not need for immediate action. Nor has the board received any comments from any homeowner that there was an issue with persistent speeding.

Obviously there is concern within our community that there is an issue with excessive speeds on our streets, mainly Brentwood Trail. The board would like to have a short meeting with our homeowners to see if the entire neighborhood would like to see all the speed limits which are currently set at 30 to be reduced to help mitigate speeding on our neighborhood streets. It makes sense to avoid confusion that all our streets have the consistent posted speed limits.

We are currently looking to secure a meeting place and anticipate sending out information regarding such a meeting in the next couple of days.

It is our hope that if any member of the community has a concern that they feel free to contact any member of the board to raise such issue. We are here to help make our neighborhood continue to be a desirable place to live,

Thank You.

The BEHOA Board
